About This Game

AMAZING AND INTERESTING
NOW IN BETA
HOLD SPACE TO TURN

-A very simple Music-based Game.
-Try to beat every level that I set.
-Hold space bar to turn and release the space bar to go back to the previous direction.
-Several easy tutoring level to make you get familiar of this game.
-Fast levels to make you challenge your own brain.
-A basic level generator to allow you to upload your own song.
-A BPM determiner to help with getting your music's BPM.
-Interesting graphics and enjoyable gameplay.

Basically, the purpose of this game is to pass a level, and listen to the music. Pass a level, and try a harder one. Just use your mouse to choose, and use your spacebar to play, EASY!!! Everyone can play the music. Now, there are 11 different songs in the game, and there will be more. You can also upload your own song in the game. For those music fans, if you want your self-composed music to appear in our game, you are welcome to email me. On the other hand, there is a BPM testing feature in our game. It might be useful for some of our player.

In this game, you can upload your own song, however, due to our technique problem, we only support .wav files. If you have some songs to upload, you can send it to my email and I will reply you in less than 1 day. By the way, if there is any bugs or

errors or something not good enough, or copyright problems; you can comment this game directly in Steam, or you can also email me. I will try to improve this in the next beta of the game.

THE MAC OS WILL BE ONLINE SOON!!!
